CamNetix

COMPANY PROFILE

IT infrastructure.
Electronic systems.
One connected approach.

CamNetix plans, supplies, installs and supports the infrastructure and electronic systems that businesses rely on. We connect the physical installation with the configuration and practical support needed to use it.

01 IT infrastructure & support

Networks, Wi-Fi, structured cabling, fibre splicing and racks.
Servers, Active Directory, storage and shared resources.
Firewalls, endpoint protection, software licences and technical support.

02 Electronic systems & integration

CCTV, intrusion alarms, access control and time attendance.
Fire detection, professional audio and voice evacuation.
Hotel locks, parking systems, IP phones, UPS and inverter systems.

03 Web & digital services

Business websites and ongoing website maintenance.
Domain, DNS and hosting configuration.
Technical coordination with the IT systems your business uses.

SUPPLY / INSTALLATION / CONFIGURATION / SUPPORT

EXPERIENCE & PARTNERSHIPS

Technical depth.
A dependable partner.

15+

years of hands-on technical experience

Our professional experience spans IT infrastructure and electronic systems. Based in Tirana, we work across Albania and consider international enquiries around the project and its support requirements.

We also work alongside installers, integrators and partners in our field: extra technical capacity, support with complex configurations and practical troubleshooting when a project needs it.

From first conversation to handover

01 Understand the site

Review requirements, existing systems and practical constraints.

02 Define the work

Agree equipment, installation, testing and exclusions.

03 Install, configure & test

Connect systems and check the agreed functions.

04 Hand over & support

Explain use, documentation and support arrangements.

Tell us what needs to work.
